

Garbage, Trash, Waste, Refuse and of such category.

I am interested in understanding the journey of my trash from my bin to wherever it ends up and the hands it passes through and whether the place where it ends up is the place where it is meant to be.

Some of the binaries that I could think of while thinking about this project are:

Useful		Useless
Sorted/ Organized		Unsorted/ disorganized
Clean/ zero emission		Polluting (the concept of trash as polluting)
Bio degradable/ Organic/ Environment friendly		Non degradable/ plastic/ toxic
Private responsibility (self-managed)	Communal responsibility (Collectively managed)	Public responsibility (managed by local governing body)
Dispose	Re-Invest /reconfigure	Accumulate
Homogenous		Diverse / heterogeneous
Recyclable		Non- recyclable
