

What scholarly infrastructure has supported this STS formation?

The Drexel STS Colloquium Series exemplifies how scholarly infrastructure can support research community. Our colloquium series features visiting speakers throughout the year, and our faculty host one to two mini-conferences each year as well. Perhaps our favorite component of the Series, however, is the monthly Works-in-Progress lunch. Each WIP lunch features two, 15-20 minute presentations, one by a student and the second by a faculty member. The WIP format allows us to engage each others research and work through ideas together. These talks have also been the seeds of collaboration and future endeavors. This photo of a ship restoration project was taken by Mimi Sheller at the Philadelphia Navy Yard for her new book on mobility justice.

Works-in-Progress Animating STS @ Drexel University

Kenner, Ali, and Eliza Nobles. 2018. "Works-in-Progress". In Animating STS @ Drexel University, created by Ali Kenner and Eliza Nobles.
