

Wishlist 2072  
Katie Ulrich

Topics, issues, questions, and places that I hope to research over the next 50 years:

1. Scientific storytelling, science as storytelling (scientific concepts as social concepts)
2. Communication of science beyond academia
3. Public engagement with science
4. Scientists' self-understandings and reflexivity (incl my own)
5. Equity and justice in/through science (and the limits of this)
6. Narratives of social change and transformation
7. Knowledge production
8. The multiplicities of things
9. Chemicals and chemical transformations
10. Energy
11. Environmentalism
12. Extraction
13. Biotech
14. Plants
15. Plant-based substitutes
16. Biology
17. Chemistry
18. Lab practices
19. Technicalities
20. Mundane happenings and artifacts
21. Logistics
22. Maintenance vs change
23. What status quos does the mobilization of particular science projects rely on, materially, conceptually, and otherwise? How can these be challenged?
24. Brazil
25. United States
